

Name: OPERATION POLYTECH STRETCH jacket

Code: MC5745QN

MC57 CLOTHING - POLYTECH SERIES

Description

Twill jacket 74% cotton, 22% polyester, 3% elastane, 1% conductive fibre, 280 g/ml; contrasting fabric 75% cotton, 24% polyester, 1% conductive fibre, 280 g/ml;

- Ç Stand-up collar with Velcro fastening, effectively protects the neck area from potentially harmful external agents;
- Ç Two chest pockets with contrasting colour flaps and Velcro fastenings, for quick and easy access to small items;
- Ç Two lower pockets with contrasting colour flaps and Velcro fastenings;

- Ç Gas detector loop on the right, allowing the device to be securely attached and easily accessible;
- Ç Elasticated cuffs prevent dust, debris, splashes or chemicals from entering the sleeve;
- Ç Double stitching in areas most subject to stress and wear, to ensure greater strength and durability.

THE JACKET MUST BE WORN IN COMBINATION WITH THE TROUSERS

Work jacket made of multi-purpose fabric with fire-retardant treatment, designed to ensure maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. It offers integrated protection from flames, convective, radiant and contact heat, as well as small projections of molten metal. The garment also provides protection against limited splashes of liquid chemicals. Antistatic properties and effectiveness in containing the energy released by electric arcs up to 4 kA complete the jacket's safety profile. The high percentage of cotton, combined with technical fibres, helps to perfectly balance protection and comfort, making the garment soft and breathable without compromising strength and mechanical resistance. The stretch fabric promotes freedom of movement for the operator, allowing dynamic postures to be adopted during work activities. Reinforcement bars, applied to the points subject to greater stress, increase the garment's resistance and enhance its aesthetic finish.

The mandarin collar, with no protruding points or flaps, effectively protects the neck area from heat, splashes and external agents, while reducing the risk of entanglement in machinery or equipment. The 4 pockets make it functional and practical, allowing you to always have the tools and items you need for work at your fingertips. The elasticated cuffs ensure a snug fit around the wrist, preventing dust, debris, splashes and chemicals from entering the sleeve.

The high-visibility contrasting yellow inserts complete the modern design and help to increase operator safety in environments with poor lighting or reduced visibility.

CERTIFICATION IN PROGRESS

The product has been designed and manufactured to comply with Regulation (EU) 2016/425 as amended.

The OEKO-TEX® certificate of the main outer fabric is under review.
