

Name: SUPERTECH 360 jacket	Code: MC5940ED	MC59 CLOTHING - SUPERTECH SERIES
-----------------------------------	-----------------------	---

Description

Work jacket made of multipurpose fabric with fire-retardant treatment, designed to ensure maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. It offers integrated protection against flames, convective, radiant and contact heat, as well as small projections of molten metal. The garment also guarantees protection against limited splashes of liquid chemicals. Antistatic properties and effectiveness in containing the energy released by electric arcs up to 4 kA complete the jacket's safety profile. Certified in class 2 for high visibility, the garment guarantees a medium-high level of visibility in daylight and at night, even in the presence of artificial lighting such as vehicle headlights. The high percentage of cotton, combined with technical fibres, helps to perfectly balance protection and comfort, making the garment soft and breathable without compromising strength and mechanical resistance.

The stand-up collar, with no protruding points or flaps, effectively protects the neck area from heat, splashes and external agents, while reducing the risk of entanglement in machinery or equipment. The 4 pockets, one of them with concealed badge holders, make it functional and practical, allowing essential tools and items to be kept close at hand during work. The elasticated cuffs ensure a snug fit around the wrist, preventing dust, debris, splashes and chemicals from entering the sleeve. The reflective bands sewn onto the sleeves and waist and the reflective inserts on the chest help to increase the operator's visibility, improving safety during work.

CERTIFICATION IN PROGRESS

The product has been designed and manufactured to comply with Regulation (EU) 2016/425.

The OEKO-TEX® certificate of the main outer fabric is under review.
