Name: OPERATION SUPERTech class 1 trousers	Code: MC5981QN	MC59 CLOTHING - SUPERTech SERIES
---	-----------------------	---

Work trousers made from multi-purpose fabric with fire-retardant treatment, designed to guarantee maximum safety for those working in high-risk environments where exposure to multiple hazards is constant. They offer integrated protection against flames, convective and radiant heat, and contact, as well as molten metal splashes. Antistatic properties and effectiveness in containing the energy released by electric arcs up to 4 kA complete the safety profile of these trousers. The high percentage of cotton, combined with technical fibres, helps to perfectly balance protection and comfort, making the garment soft and breathable without compromising strength and mechanical resistance. The reflective strips sewn onto the legs significantly increase the operator's visibility, improving safety during work activities. The 5 pockets make it extremely functional and practical, allowing you to always have essential tools and items close at hand while working.

The OEKO-TEX® certificate of the main outer fabric is under review.

Store in a cool, dry place, away from heat sources and away from light. Before each use, carry out a visual check to ensure that the device is in perfect condition, undamaged and clean, and replace it if it is not intact. Garments offer protection only for the part of the body actually covered and must therefore be integrated, depending on the intended use, with suitable PPE to protect exposed parts of the body (head, hands, feet). Where necessary, use appropriate respiratory and eye protection. The safety features indicated are only respected if the device is regularly worn and fastened and in perfect condition. Follow the recommended washing instructions.
